

BLAU PARTS®

Automotive Oils and Lubricants

In accordance with Blauparts' continuous improvement philosophy we are pleased to present Ravenol automotive oils and lubricants! Since 1946 Ravenol of Germany has been at the forefront of innovation creating the highest quality oils and lubricants specific to advanced engine and transmission designs. Ravenol is recognized throughout Europe as a leader in fluid technology, in addition to keeping up with ever changing fluid specifications. They have succeeded in meeting and often exceeding low emissions, optimal fuel economy, excellent engine protection, and performance requirements set out by leading European manufacturers. Ravenol has formal approvals from leading vehicle manufacturers such as Mercedes Benz, Volkswagen Audi, BMW, Porsche, Volvo, ZF, and many more. Not every oil company has accomplished the formidable task of gaining such formal approvals.

Never before in automotive history has premium oil requirements been so critical. European engines have reached advanced technological designs, causing motor oil manufacturers to meet stringent specifications. Why?

Two examples of technological oil challenges are as follows:

1) Motor oil must help the engine's advanced design achieve the lowest carbon footprint possible (low emissions) and the best fuel economy (reduce internal engine friction to the maximum).

2) Accomplishing low emissions and maximum fuel economy while extending oil change intervals up to 10,000 miles.

Innovation - Quality - Development

Manufactured In Germany Since 1946

Classified as high performance and energy conserving, Ravenol motor oils and lubricants contain proprietary additives that offer unique profile characteristics specifically formulated for the advanced requirements of European cars. Most demanding German automotive owners want only the best fluids. Blauparts believes in providing oils and lubricants that are formulated and engineered to meet your car's stringent specifications. Ravenol of Germany has done just that, being the superior choice for discriminating Audi Vw owners!
