Blauparts is pleased to offer the Mahle Original VW Touareg TDI fuel filter for the 3.0L engine! Mahle is an Official O.E. fuel filter manufacturer and has been supplying fuel filters to the German automakers for years. Since the late 1920's Mahle has set the standard in filtration as Germany's premier automotive filter manufacturer. Mahle's continuous engineering and innovation is driven by performance. Mahle fuel filters use the latest generation in fuel filter designs and state-of-the-art filter material.

In most cases the fuel filter is one of the most overlooked scheduled maintenance items on a vehicle. Your VW Touareg TDI fuel filter is responsible for the removal of dirt, dust, soot, particles, contaminants, water and other substances that can negatively affect the efficiency of your engine's fuel injection systems. A bad or plugged fuel filter can result in poor fuel economy and a lack of engine performance. Regular fuel filter changes can result in the protection of your fuel injection system, trouble-free engine operation, and help avoid inconvenient breakdowns and costly engine repairs. Blauparts recommends replacing your Touareg TDI fuel filter at the manufacturer's specified replacement interval. The recommended service interval for the 3.0L VW Touareg TDI is to drain or flush the fuel filter every 10,000 miles and change it every 20,000 miles. You may also want to consider replacing your fuel filter before winter months. Your fuel filter filters moisture and water from your diesel fuel. If moisture is not removed from the fuel filter during cold winter months this can cause emulsified water to form a fuel/ice slush, further restricting the fuel filter causing poor performance.
