

NEW PRODUCT: VW G11 Antifreeze - Blue

July 29, 2015

Ravenol HTC Blue Antifreeze From Germany!

Subject: Ravenol HTC Coolant (G11 Blue Coolant)

Application: 1980-1997 VW Models

Part Number: J4D2022

OE Part Numbers: ZVW 237 105, G001100, VW TL 744-C

Release Date: 7/29/2015

Blauparts is please to offer Ravenol HTC Coolant Antifreeze.

Ravenol HTC Hybrid Technology Coolant Concentrate is an all-season amine and phosphate-free mono-ethylene glycol based coolant with frost and rust protection. Ravenol HTC coolant has formal factory approvals for coolant specifications VW TL 774-C and Mercedes Benz MB 325.0. Ravenol HTC coolant is also designed to meet Porsche, Land rover, BMW, Opel, Saab, Ford, Jaguar, Honda, and General Motors antifreeze specifications. This product is formulated based on a proven inhibitor development by combining silicates with the organic additive technology OAT as an extended life coolant. The quality of an antifreeze is no longer just determined by the antifreeze effect (which automatically exists in an ethylene-glycol based product), but by the rust protection. That is why automakers subject antifreeze to lengthy corrosion and cavitation tests. Ravenol HTC Hybrid Technology Coolant protects the cooling system from rust, frost, and in summer, from overheating.

German Ravenol HTC Audi VW G11 Concentrated Coolant Features:

- Manufactured and bottled in Germany
- Formal factory approvals for coolant specifications Volkswagen VW TL 774-C and Mercedes Benz MB 325.0
- Excellent for use in cast iron or aluminium engines, or alloys of the two metals, and aluminium and copper alloy radiators
- Good reserve alkalinity
- Protection from corrosion and cavitation
- Prevents sediments and foaming in the cooling system
- Compatible with elastomers used in automotive radiators

Note: This is concentrated coolant and should be mixed 1:1 with distilled or deionized water. A 1.5 liter bottle will yields 3.0 liters when mixed 1:1 with distilled or deionized water for -40Å° C.

Note: G11 coolants should not be mixed with pink/violet G12 or G13 coolants.
