Release Date: 3/18/2016

Blauparts is happy to make available the perfect compliment to your transmission fluid and filter change service. This transmission fluid filling transfer tank tool makes changing differential and transmission fluid so easy. Simply pour your new transmission fluid in the tank, affix the transmission specific adapter to the transmission, pump and pressurize the tank, and open the valve as fluid flows quickly into the transmission. This tool is a must for a simple, clean, easy, and quick transmission fluid changing! The tool will also work great for changing manual transmission fluid or even differential fluids. Forget the mess during your next transmission fluid service with our transmission fluid transfer tank tool.

ATF MTF and Differential Fluid Transfer Tank Features:

- 9 liter tank capacity
- Fluid level measuring indicators on tank
- Manual pump, with locking feature, adds air above the fluid level to prevent aeration
- 1.5 meter (5â€™™) clear dispensing hose is removable and features spring support protection
- High quality metal levered ball valve controls flow and includes hanging hook
- 35 PSI (0 â€“ 2.5 bar) pressure gauge, fill hole, double-handle for carrying, air-valve release
- Compatible with other brand transmission adapters.

For over 26 years Blauparts vision has been to provide the highest quality products along with the best customer service! We feel products such as this one are an excellent reflection of our company values and of the quality your European automobiles should be serviced with. Please feel free to contact us with any questions you may have on our products.
