Blauparts is pleased to make available our full line of timing belt kit options for the MK6 Volkswagen Jetta 2.0 liter 8 valve engine.

Blauparts goal is to make your timing belt repair job as easy as possible and a success. Simply changing your Volkswagen's timing belt isn't enough. Why? Around the timing belt service interval, due to age the integrity of the tensioners, water pump, thermostat, coolant, seals, and other integral parts of the timing belt system are at the end or very near the end of their service life. Some technicians or individuals make the mistake of only replacing the timing belt. Then, 10,000-20,000 miles later, their new timing belt fails due to an aged tensioner, idler bearing, or water pump failure.

Using over 27 years of Midwest Wisconsin hands on Audi and Volkswagen service experience we have assembled three Volkswagen Jetta timing belt kit variations for the 2.0 liter 8 valve engine. Each timing belt kit variation comes with a different amount of parts depending on your budget or how extensive you choose to be with your timing belt service. All timing belt kits come with the same level of Official O.E. quality. We have a direct partnership with our timing belt component manufacturers. These are the same brand-name parts that were equipped on your vehicle's assembly lines. The same brand-name manufacturers that VAG dealers use, just without the logos, and the same brand name parts that have been trusted by Audi and Volkswagen technicians throughout the world for decades!

We are dedicated to providing truly the best timing belt components in each of our timing belt kits! For over 27 years Blauparts vision has been to provide the highest quality Audi and Volkswagen products along with the best customer service! All of our timing belt kits are stocked and ready to ship from Manitowoc Wisconsin! We carry one of the United States largest inventory of exclusive Audi and Volkswagen timing belt kits. Our Volkswagen Jetta timing belt kit options are an excellent reflection of our company values and in the end our goal is to provide your Volkswagen with the high quality parts in which it should be serviced with. Please feel free to contact us with any questions you may have and we wish to thank our customers for their continued support!
