Blauparts is pleased to make available our a coil spring kit option for the Audi A4 1.8T Quattro Sedan Models.

Restore your Audi A4 back to its comfortable yet sporty ride quality! Overtime, original Audi A4 springs begin to sag and sometimes even break. This can result in abnormal driving characteristics. When suspension coil springs become saggy or break, most Audi A4 drivers will experience clunking noises, unhealthy vehicle weight transfer, and dangerous vehicle performance characteristics. If the problem isn't fixed, improper alignment occurs, potentially damaging your tires and other suspension components. Keeping your Audi A4 suspension in perfect working order is a must. Blauparts goal is to make your Audi A4 coil spring suspension repair job as easy as possible and a success. Our Audi A4 spring kits are designed as an OEM replacement coil spring. Customers will experience a standard OE ride height with a slight increase in handling without sacrificing driving or ride comfort.

All of our Audi spring kits have been designed and tested with your specific vehicle characteristics in mind. The proper vehicle balance, weight transfer, and performance handling were all taken into consideration. Our Audi A4 spring kits provide the optimum ride comfort and performance for your Audi.

We are dedicated to providing truly the best Audi parts and components! For over 27 years Blauparts vision has been to provide the highest quality Audi and Volkswagen products along with the best customer service! All of our coil spring kits are stocked and ready to ship from Manitowoc Wisconsin! Our Audi A4 coil spring kits are an excellent reflection of our company values and in the end our goal is to provide your Audi with the high quality parts in which it should be serviced with. Please feel free to contact us with any questions you may have and we wish to thank our customers for their continued support!
