

BLAU[®] HCC SERIES

High Carbon Chromium Brake Rotors

Low introductory
pricing available from
BLAUPARTS[®].com

QUALITY

- HCC is the perfect formulation of high carbon cast iron alloy with chromium (Cr) material.
- HCC = Higher resistance to distortion and thermal cracking.
- HCC = No glazing of the pads. Micro-cut groove pattern ensures constant brake pad renewal.
- HCC = Special machine-finish (micro-cut groove pattern) allows for fast break-in.

PERFORMANCE

- HCC = Optimal thermal dissipation of heat.
- HCC = Cooler brake rotor temperatures.
- HCC = Less brake fade.
- HCC = High resistance to distortion, thermal cracking.
- HCC = Shorter stopping distances.
- HCC = Improved driving confidence.
- HCC = Improved brake pedal feel.
